- We're also conducting our first tribal consultation with the Seneca for our last draft permit (with two more draft permits likely to conduct similar consultations with the same tribe). The tribe is located in Region 2 (New York) and our permitting action is in Pennsylvania, however, because the injection well(s) is in the Allegheny River watershed and the Allegheny River flows into the Seneca Nation, the tribe requested a formal consultation. From this point forward, we intend to conduct tribal consultations with the Seneca Nation whenever a permitting action occurs in the Allegheny River watershed.
